## † Investment and Administrative Fees

Investment fees are charged by the fund managers to cover the costs of investing money.

Administrative fees cover the costs of maintaining a retirement plan, such as customer service, statements, and recordkeeping. Both fees are charged as a fraction of a percent of the assets under management and are calculated in each fund's daily unit value. Therefore, balances in participant accounts and all rates of return are shown after these fees have been deducted.

The chart below shows the annual investment fee added to the administrative fee to give the total fee charged for the Growth Fund. The chart also indicates the annual dollar amount charged per \$1,000 invested.

	Annual Investment Fee	Annual Administrative Fee	Total Annual Fee	Dollars per \$1000
<b>Growth Fund</b>	0.26%	0.16%	0.42%	\$4.20

## Transfers

Participants are allowed to submit one transfer request (whether electronically, by fax, mail or hand delivered) for their current account balances every 7 days. This applies separately to each plan in which they participate — the 401(k), 457, Roth IRA and traditional IRA each constituting separate plans. In addition, individuals who transfer any or all of their current account between core investment options more often than once every 30 days will be charged a 2% administrative fee on amounts transferred. Each transfer, after being processed, will start a new 30-day period. The fees generated by this policy will be used to reduce the administrative expenses for all plan participants.

Transfer requests received at URS before the close of the New York Stock Exchange (NYSE), generally 2:00 pm Mountain Time, will be transferred using that evening's closing market values. Requests received after the close of the NYSE will be transferred using the next business day's closing market values. On days of unusually heavy transfer activity, computer system failure, or other unforeseen circumstances, URS reserves the right to process transfers using the next available business day's closing market values.
