Do You Need to Make Any Adjustments?

Retirement Income

Retirement Stability

Sources of retirement income can come in many forms. They may come through Social Security and individual savings plans.

As a member who has selected the Tier 2 401(k) Option, it is important to actively manage your retirement options to ensure you have stable sources of income in retirement.

Savings Plans – 401(k), 457, IRAs

Investment accounts that work for you before and after retirement.

It's Never Too Late to Start

In this hypothetical illustration: Each saves **15%**, earns a **\$50,000** annual salary (with a 2% annual raise) and gets a **5%** investment return.

How Much Should You Save?

Depending on your age, your retirement income replacement goal, and any existing retirement savings the amount you should save may vary. Conventional wisdom suggests an overall savings rate of 15-20% of your gross income. However, your rate may differ based on your needs. If you want a recommendation for your specific situation, you can sign up online for an individual retirement planning session through your myURS account.

You don't have to reach that goal all at once (though the more you can start with, the better!). Start with 1% this year, and then add another 1% every year for the next few years. You'll reach your goal in no time.

Are you on track to reach YOUR savings rate?

If not what steps can you take to enhance your personal retirement savings rate?

	Example		You
Goal:	<div>20%</div>	Goal:	<div></div>
1. Record your current savings percentage.	<div>5%</div>		<div></div>
2. What is your employer contributing?	<div>10%</div>		<div></div>
3. Total	<div>15%</div>		<div></div>
4. Do you need to change your savings percentage? If so how much do you plan to save?	<div>Yes, 1% more each year for the next 5 years to reach a 20% total savings rate.</div>		<div></div>

How Much Could You Have?

Retirement Income

Estimate how much retirement savings you may have by using the Savings Plans Future Values Calculator at www.urs.org/Calculators.

Fill in the blanks below to track your current savings:

Current total balances (401(k), 457, IRAs)	
Monthly gross wages: (annual gross income ÷ 12)	
Projected average annual increase in wages (as a percent)	
Your monthly contributions (% of gross wages)	
Employer contributions (% of gross wages)	10% (Public Employee) or 14% (Public Safety/Firefighter)
Estimated years of future contributions	
Rate of return you expect to receive while working	7% default
Number of years you would like to receive monthly withdrawals (How many years will you live after retirement?)	
Rate of return you expect during withdrawals (retirement)	4% default
Average rate of inflation you expect	3% default
Future balance	
Monthly withdrawal from future balance	
Monthly withdrawal from balance adjusted for inflation	

This information is designed to help you create an estimate of what you may receive in retirement benefits from your retirement savings account. Please note that the estimate will be based on the information you input and will only be as accurate as the information that you provide.

Stay the Course

Retirement Income

Even through the ups and downs in the financial markets it is best to stay the course. Historically, many events have resulted in down turns in the economy. However, investors who have stayed the course through the ups and downs tend to do better in the long-term.

Rule of 72

As you stay the course and continue to invest your money, it is amazing how quickly your money can double. A general rule of thumb to tell you how long it will take for your money to double is the Rule of 72. The formula for the Rule of 72 is:

$$72 \div \text{Rate of Return} = \text{Years to Double}$$

For example, if you were to begin with \$1,000 and let compound interest do the work:

Rate of Return	3%	5%	7%
Years to Double			10 years = \$2,000
		14 years = \$2,000	20 years = \$4,000
	24 years = \$2,000	28 years = \$4,000	30 years = \$8,000
		42 years = \$8,000	40 years = \$16,000
	48 years = \$4,000	54 years = \$16,000	50 years = \$32,000

Diversification

In creating your investment portfolio you want to make sure you have a good mixture of different types of investments.

As illustrated below, you can see asset classes within the Core Investment Fund options that URS offers. The funds earned higher returns some years and experienced lower returns other years. For example, the International Fund, made up of global stocks, over the course of the past 10 years showed incredible growth in 2007, 2009 and 2012. However, it had lower growth in other years. Ultimately, the fund generated 0.1% over a 10-year period.

Now, if you look at the Balanced Fund, which includes 60% stocks and 40% bonds, it had mid-level performance every year. It never was the highest performer, nor was it the lowest. Ultimately, the fund generated 6.9% growth over a 10-year period.

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Average
Large Cap Growth Fund	13.0%	9.0%	23.3%	33.2%	2.2%	32.3%	51.8%	31.6%	1.9%	52.2%	13.7%

It is recommended that you have an appropriate mix of investments to ensure you will have steady growth, while minimizing potential losses in the markets.

The URS Target Date Funds serve this same purpose by offering a diverse mix of stocks, real assets, and bonds to allow for growth while attempting to minimize losses.

Dollar Cost Averaging

Retirement Income

Dollar cost averaging (DCA) simply means investing the same dollar amount in a retirement account, pay period after pay period, regardless of how the financial markets are performing. It looks like this:

Dollar Cost Averaging

Example

If you purchase \$100 worth of shares every month at \$5 per share (the investment never changes value), you would have 100 shares five months later. Your account value would be \$500.

If instead you purchase \$100 worth of shares and the investment fluctuates as shown above, you end up with almost 108 shares worth \$5 each after five months. This DCA account value is worth about \$540, which is \$40 more! The DCA account is worth an extra 8%, merely because it purchased more shares in Month 2—automatically through payroll deduction—when the investment was down in value (aka “on sale!”).

Investing is simply a race to collect shares. When an investment is on sale (the market is down), you buy more shares with a constant dollar amount invested (such as through payroll deduction). When the investment/market rebounds, your shares are worth more. More shares at a higher value means a larger retirement account. What ultimately matters is how many shares you have, and how much they have grown in value by the time you reach retirement!

How Should You Invest?

Retirement Income

How you invest your money is crucial to the overall performance of your retirement accounts. It is important to make sure you have diversified your investment portfolio properly to maximize your earnings while minimizing your losses.

The longer you have until retirement, the more aggressively you can invest a larger portion of your portfolio in stocks. Stocks will give your portfolio more potential for long-term growth. However, there may be more short-term volatility.

If you have less time until retirement, consider investing in lower risk investments, such as bonds. This approach helps to preserve your retirement savings.

However, everyone's situation is going to be different. Your current age, life expectancy, income, retirement goals, and risk aversion will determine how you will invest your retirement savings.

Date of Retirement

Tax Smart Strategies

Distributions from nearly all retirement resources (pension, Social Security, 401k, IRA, etc.) are taxable, so be careful not to take so much in a single calendar year that you end up in a higher tax bracket. The one exception could be tax-free Roth IRA withdrawals (assuming you meet the requirements).

On the flip side, if you're in a lower tax bracket in a particular year, it may make sense to fill up that year's "tax bracket bucket." Take out just enough money from your non-Roth accounts to keep yourself in your current, lower tax bracket; doing so locks in your tax bracket for that money.

What if you don't really need the money but could still fill up a lower tax bucket? Consider doing a Roth conversion. You'll pay income tax on the amount converted, but you create the potential to avoid any future income taxation on the earnings you convert.

Five Questions to Ask Before You Invest

1. Is the seller licensed?

Smart investors check the background of anyone promoting an investment opportunity.

2. Is the investment registered?

Registration provides access to key information about the company and its finances.

3. Do I understand the investment?

Read, ask, and then verify. If you are still confused about the product, think twice about investing.

4. Do the risks compare with the rewards?

Greater rewards come with greater risk.

Promises of high returns with little or no risk may be fraud.

5. Where can I receive help?

When it comes to investing wisely, unbiased information can be a great advantage.

The Full Retirement Age Is Increasing

Full retirement age (also called "normal retirement age") had been 65 for many years. However, beginning with people born in 1938 or later, that age gradually increases until it reaches 67 for people born after 1959.

The 1983 Social Security Amendments included a provision for **raising the full retirement age beginning with people born in 1938 or later**. The Congress cited improvements in the health of older people and increases in average life expectancy as primary reasons for increasing the normal retirement age.

Note: If you were born on January 1st of any year you should refer to the previous year.

If you were born in: 1937 or earlier

Your Retirement Guide

Securing today
and tomorrow

What's the best age to retire? It depends! Consider some of these important factors below to help you decide when to start your Social Security benefits.

Step 1: Review Your Earnings History

Your monthly benefit amount is based on your highest 35 years of earnings. Find your earnings history by reading your *Social Security Statement* at www.ssa.gov/myaccount

Step 2: Find Your Full Retirement Age

Full Retirement Age (FRA) is the age you need to be to have no reduction in your monthly benefit amount. FRA is based on the year you were born.

Find your FRA at:

www.ssa.gov/planners/retire/ageincrease.html

Step 3: Know Your Options

If eligible, you can start your benefit anywhere from age 62 – 70. The longer you wait, the more you will get.

If you're eligible for both your own benefits and spouses benefits, you must apply for both. You'll get a combination of benefits equaling the higher benefit.

If you're eligible for widow(er) benefits, you can select to start your own benefit, or file from your deceased spouses' account if eligible.

age
64

Once you start your benefit, you are locked in to that benefit amount.

Get your retirement estimates at:
www.ssa.gov/oneservices

Step 4: Consider Other Things That Could Affect Your Monthly Benefit Amount

Benefits may be temporarily reduced if you are working and receiving benefits before FRA.

In some cases, you may have to pay taxes on your Social Security benefit amount.

If you worked for a job not covered by Social Security, your monthly benefit amount may be reduced.

You should sign up for Medicare three months before age 65, even if you don't plan to retire. For more information, visit:

<https://www.ssa.gov/benefits/medicare/>

Take into account your longevity and health. Today, 1-in-3 65-year-olds live to age 90.

Find the average life expectancy for someone your age at:
www.ssa.gov/planners/lifeexpectancy.html

Step 5: File for Your Benefits

You can apply up to four months before the date you want your benefits to start. Visit www.ssa.gov/retire to apply.

For more information on how you qualify for benefits and material mentioned in this infographic, visit Your Retirement Checklist at <https://www.ssa.gov/pubs/EN-05-10377.pdf>

Do You Need to Make Any Adjustments?

Healthcare During Retirement

Medical care can be one of the largest expenses in retirement and could put a major dent in your nest egg. Look carefully at your options and plan how you will pay for healthcare. Below is some general information to help you get started.

Early Retiree (before age 65)

One major challenge of retiring early is getting adequate medical coverage between the time you stop working and become eligible for Medicare (generally at age 65). Here are some options to consider.

Employer Benefits

Some employers offer early retiree health coverage. Some may convert unused sick time to a dollar amount and fund a Health Reimbursement Account (HRA) that you can use to pay for medical expenses. Check with your employer to see what options, if any, are available to you.

COBRA

COBRA allows you to maintain your current active health coverage for a limited period of time, but expect to pay a higher premium than you did while working. Employers usually pay the majority of the monthly premium for active employees, but if you're on COBRA you must pay the entire premium, plus 2% more for administrative costs.

The Marketplace

The Marketplace is an option for those that have retired early from active group coverage and are not yet eligible for Medicare. Insurance plans in the Marketplace are offered by private companies. You can choose individual or family plans. You may also qualify for federal subsidies depending on your income. Visit www.healthcare.gov for information about the Marketplace and plan options.

Health Savings Accounts (HSA)

You can use money from an HSA to pay for qualified healthcare expenditures, tax free. Qualified expenses include hospital and doctor visits, COBRA premiums, Medicare Part A, B, C, and D premiums and copays, and much more (details: www.irs.gov/pub/irs-pdf/p969.pdf). If you choose an HSA-qualified plan while you're still working (such as The PEHP STAR Plan) you and your employer can put money into the account tax free, up to the IRS annual limits. You can use your HSA to build a healthcare nest egg for retirement. An HSA is like a flexible spending account (FSA), but better. You never have to worry about forfeiting what you don't spend. Money in your HSA carries over from year-to-year and even from employer-to-employer and can be passed on to your heirs.

You can use the money tax-free for qualified medical expenses. If you enrolled in an HSA plan prior to retirement, consider how you will use these assets in your healthcare planning.

Medicare

Medicare is a national health insurance program for people age 65 and over or otherwise eligible, whether you're retired or still working.

Medicare Part A (Hospital Coverage)

Part A provides coverage for inpatient hospital stays and other inpatient facilities. There's a \$1,676 deductible per benefit period in 2025. Coverage is based on type of facility and length of stay. For example, Medicare pays all charges of your first 60 days in the hospital, and a portion of charges between 61-150 days. No charges are covered for in-hospital stays over 150 days.

Medicare Part B (Medical Coverage)

Part B provides coverage for most medical services, including outpatient physician and facility, paying 80% after a \$287 deductible per calendar year in 2025. A monthly premium is taken from your Social Security check – generally \$185 in 2025 for most. Others may pay more based on their modified adjusted gross income as reported on your income tax return from two years ago.

Be careful when making large withdrawals from a 401(k) or an IRA, for example, because those withdrawals will increase your modified adjusted gross income, which may result in your paying a higher premium for Part B. The same is true for Roth conversions.

Medicare Part C (Advantage Plans)

These are Medicare-approved plans offered by private companies. You are required to enroll in Medicare Parts A and B and may pay an additional premium depending on your Part C plan's benefits. These plans must provide certain coverage to qualify, but benefits may vary.

Medicare Part D (Prescription Drug Plans)

These are Medicare-approved drug plans offered by private companies. Costs vary based on benefits.

Medicare Supplement

Medicare offers basic coverage. You are still responsible for coinsurance and deductibles. Consider a Medicare Supplement plan to help you with these additional costs. URS members and their spouses are eligible for PEHP Medicare Supplement at age 65 or otherwise eligible. See the next page for more information.

Life Insurance and Your Money

An Important Part of Your Financial Plan » Even the most well-thought-out plan could fall through if something were to happen to you, leaving your family without the income they need.

How Much Life Insurance Should I Consider?

First, consider having enough for your family to cover such things as outstanding expenses, e.g., mortgage, debt, credit cards, and funeral expenses. Second, figure how much income replacement they would need. One common rule of thumb says your life insurance coverage should equal seven to 10 times your annual salary, but every situation is different. Many online calculators can help you figure out how much you need.

Life Events

It's particularly important to review your life insurance coverage when you get married, have a child, or experience some other significant life event, like buying a new home.

What Does My Employer Offer?

Employers generally offer term life insurance. In many cases, your employer provides a certain amount of coverage for you with the option to buy more for yourself, your spouse, and dependent children, either with or without medical underwriting, depending on when and how much coverage you request. Unlike other types of insurance, you can typically request more coverage at anytime and not just during open enrollment. This coverage lasts only as long as your employment, during which time your health status can change along with your ability to qualify for a new policy.

URS Death Benefit

As a URS member, you may be entitled to a death benefit. The amount this benefit pays your beneficiaries varies among retirement systems. For more information, go to www.urs.org.

If your employer offers PEHP Life, you can apply to increase your coverages at any time, not just during open enrollment. Go to www.pehp.org or call 801-366-7495.

Retirement Income

Retirement Stability

Sources of retirement income can come in many forms. They may come through Social Security and individual savings plans.

As a member who has selected the Tier 2 Defined Contribution (401(k) only) Plan, it is important to actively manage your retirement options to ensure you have stable sources of income in retirement.

Social Security

Federal program providing fixed monthly income for the rest of your life.

Saving Plans – 401(k), 457, IRAs

Investment accounts that work for you before and after retirement.

How Many Years Will Your Money Need to Last?

According to data compiled by the Social Security Administration:

- » **A man** turning age 65 today can expect to live, on average, until age 84.
- » **A woman** turning age 65 today can expect to live, on average, until age 87.

And those are just averages. About one out of every three 65-year-olds today will live past age 90, and one out of seven will live past age 95.

Want to know your life expectancy? You can use Social Security's Life Expectancy Calculator* to get an estimate of how long you may live.

URS Individual Investment Options

If you prefer to design your own portfolio, you can use the eight individual URS investment options.

Income Fund

A stable value option and the most conservative investment choice. About 95% of its assets are invested in investment grade bonds that are “wrapped” with book value contracts. The contracts are financial agreements from creditworthy banks and insurance companies, protecting against changes in interest rates and smoothing returns over the duration of the portfolio.

URS Target Date Funds

Diversified Portfolio

URS Target Date Funds provide a diversified retirement portfolio through a single investment option. These funds gradually adjust throughout your career and into retirement. The investment mix — which includes stocks, bonds, and real assets — gradually and automatically shifts toward more conservative investments as you age and enter retirement.

Consider the Target Date Fund with the date closest to when you will start withdrawing funds for retirement. For example: If you're a younger employee and plan to leave the workforce and begin withdrawals around the year 2055, consider the Target Date 2055 Fund. If you're further along in your career and will begin utilizing your account close to the year 2030, consider the Target Date 2030 Fund.

Target Date Funds Asset Allocation

The asset allocation chart below shows the current breakdown of each Target Date Fund. Some of the asset classes are made up of the URS individual investment options (URS Income Fund, URS Bond Fund, URS Large Cap Stock Index Fund, URS International Fund, URS Small Cap Stock Fund) while others are exclusive to Target Date Funds (International Bonds, Global Inflation-Linked Bonds, Private Real Estate).

PCRA

Self-Directed Brokerage Account

The Schwab Personal Choice Retirement Account® (PCRA) is a self-directed brokerage account available through URS.

If you're an experienced investor looking for specific investments, this brokerage account with Charles Schwab & Co. offers access to thousands of different types of investments. This option is generally not advised for new accounts as it has minimum account balance requirements and additional risks.

Invest in:

- » More than 8,700 no-load mutual funds, including over 3,800 with no-transaction fees.
- » Stocks listed on the major U.S. exchanges, including over-the-counter stocks, and foreign securities
- » Bonds and other fixed income investments
- » Money market and brokered CDs
- » Exchange traded funds (ETFs)

For more information about PCRA enrollment, requirements, and costs, see the *Charles Schwab PCRA Self Directed Brokerage Account* brochure at www.urs.org in the *Publications* section. Or contact the Savings Plans Department for a copy.

Maintain Your Account

Periodically review your account to make sure it is still in line with your goals. Here are a few questions to ask yourself when reviewing your account:

- » Has my timeline to retirement changed?
- » Are my investments still appropriate for my age and risk tolerance?
- » Have I had a major life event (marriage, divorce, career change, change in income)?
- » Can I afford to contribute more to my retirement?

Make changes to your investments or personal contributions at myURS at www.urs.org or by submitting a Contribution and Investment Change Agreement.

Trading Policy

You may submit one transfer request (whether electronically, by fax, mail, or hand delivered) for your vested core fund balances every seven days. This applies separately — the 401(k), 457(b), Roth IRA, and Traditional IRA each constitutes a separate plan. If you transfer any or all of your current accounts more often than once every 30 days, you will be charged a 2% fee on amounts transferred. Each transfer, after being processed, will start a new 30-day period. The fees generated by this policy are used to reduce the administrative expenses for all plan participants. Changes to the investment allocation of future deposits and future contribution amounts are allowed as often as daily.

Transfer Policy

Investment changes received at URS before the close of the New York Stock Exchange (NYSE), generally 2 p.m. Mountain Time, are transferred using that evening's closing market values. Requests received after the close of the NYSE are transferred using the next business day's closing market values. On days of unusually heavy transfer activity, computer system failure or other unforeseen circumstances, URS reserves the right to process transfers using the next available business day's closing market values. Changing your future investment allocation or your contribution amounts are allowed as often as daily. Transfers to or from a PCRA are allowed once every seven calendar days. PCRA transfers must be requested at www.urs.org.

Total Fees	%	0.20 %

The fees listed above are a general sampling of types of fees charged by other providers. Some providers may not charge all or any of these fees. Others may have additional fees. The fees shown for URS are the average annual fees charged to a URS member's account and are subject to change at any time. A complete schedule of fees is available on the URS website (www.urs.org). URS does charge specific fees in certain situations, including small, inactive accounts (\$15) and for plan loan setup (\$60).

Considering an annuity? See this Securities & Exchange Commission (SEC) warning from the Utah Department of Insurance website.

Retirement Tax Considerations

- » Most retirement account distributions (such as pension payments, withdrawals from a 401(k) or an IRA) *are* subject to state and federal **income** tax (except for qualified distributions from Roth retirement accounts). However, retirement account distributions are **not** subject to Social Security taxation (i.e. FICA tax).
- » Qualified Distributions (typically money withdrawn after the account has been open for at least 5 years and the account owner is past age 59½) from a Roth IRA are **not** subject to state or federal income tax.
- » Social Security retirement payments may be subject to state and federal income tax, depending on your filing status and "combined" income level. For more information, visit the Social Security Administration website at www.ssa.gov and type "income tax" in the Search box.

Do You Need to Make Any Adjustments?

Glossary of Investment and Financial Terms

General Information

5-Year Holding Rule

A requirement in which the Roth IRA must have no withdrawals for five years after the initial tax year in which a Roth IRA was opened. If this rule is not satisfied, there may be a tax penalty on withdrawals of untaxed earnings.

401(k) Plan

A retirement savings plan in which employees may elect to contribute pre-tax dollars and in which earnings grow tax deferred.

403(b) Plan

A retirement savings plan in which employees may elect to contribute pre-tax dollars and in which earnings grow tax deferred.

457(b) Plan

A savings plan whereby governmental employees may elect to contribute pre-tax dollars to a tax-advantaged deferred compensation plan. (The URS 457 Plan is a governmental 457(b) deferred compensation plan regulated by Section 457 of the Internal Revenue Code, and authorized under Title 49 of the Utah Code.)

1099-R Tax Form

An IRS tax form that reports the amount of any distribution to the owner of an IRA or eligible savings plan.

5498 Tax Form

An IRS tax form that reports any IRA contributions, rollovers, conversions, and recharacterizations made by an IRA owner. The fair market value of the IRA is also reported on this form.

Adjusted Gross Income (AGI)

Adjusted gross income is determined by adding all sources of income, such as wages and interest income and subtracting certain deductions and adjustments to the income.

Asset

Anything having commercial or exchange value owned by an institution or individual. Investment assets can include stocks, bonds, cash, commodities, currencies, fixed income contracts, mutual funds, precious metals, real estate, and many others.

Asset Allocation

Investment funds among different asset types such as: cash or cash equivalents, bonds, stocks, real estate, etc.

Beneficiary

A person or entity who/that receives the proceeds of an eligible savings plan or IRA when the owner of the plan dies.

Bond

An interest-bearing security where the issuer agrees to pay the bondholder a specified sum of money, usually at specific intervals, and to repay the principal amount at maturity. This is a form of an IOU.

"Cap"

Large cap, mid cap, and small cap refer to the market value (capitalization) of the companies included in the investment.

Capital Appreciation

The increase in an asset's value. Gains before sale of an asset are often called "paper profits." An increase (or loss) is realized only when the asset is sold.

Cash Equivalent

Investments of such high liquidity and safety they are similar to cash.

COLA

Utah Retirement Systems determines the annual cost-of-living adjustment (COLA) based on the Federal government's consumer price index (CPI) for all urban consumers, U.S. city average.

Compounding

When interest earned on an investment remains in the account, further interest can be earned on both the initial investment and upon the added interest. This also applies to dividends from stocks or mutual funds that are reinvested.

Conversion

Funds withdrawn from a traditional IRA and deposited into a Roth IRA. A conversion is a taxable event.

Deductible Contribution

Contributions to a traditional IRA may be fully or partially deductible from your income when filing your federal income taxes. Contributions to a Roth IRA are NOT tax-deductible.

Deemed IRA

A traditional or Roth IRA maintained under an eligible employer plan that accepts voluntary employee contributions.

Defined Benefit Plan (e.g., URS Pension Plan)

A retirement plan organized to receive contributions, and pay a lifetime monthly benefit when the participant retires. The amount of this benefit is defined by a formula of service and salary and will not end or be reduced as long as the participant lives.

Defined Contribution Plan (e.g., URS 401(k)/457 Plans)

A retirement plan organized to receive contributions in amounts defined by the participant who also decides how they are invested. Upon withdrawal, the participant decides the amount and frequency of payout. It's possible for funds to run out while the participant is still living.

Direct Rollover

A direct rollover occurs when moving a distribution from an eligible plan into another eligible plan, avoiding federal tax withholding and early withdrawal penalties because the distribution is made directly to the other institution.

Direct Transfer

A direct transfer is a transfer of funds between similar plans (e.g., 401(k) to 401(k), or Roth IRA to Roth IRA).

Disability

A taxpayer is considered disabled when he or she is no longer able to engage in any substantial, gainful activity and the disability's duration is expected to be indefinite and/or result in death.

Disclosure Statement

A disclosure statement explains the rules that govern an IRA.

Distributions

Any withdrawal from an eligible savings plan or IRA.

Diversification

A spreading of risk by putting assets in several categories of investments — stocks, bonds, cash, precious metals, etc.

Dividend

Payout, usually quarterly, of some of a corporation's earnings to owners of its stock. Some stocks are more desirable for their high dividends than for capital appreciation. Mutual funds may pay out dividends or reinvest them into the portfolio.

Dollar Cost Averaging

A strategy for building assets by investing a predetermined sum at regular intervals. A dollar thus buys more shares/units when the price is low and fewer when the price is high.

Equity

The term used to express ownership interest in a company. (See *Stock*.)

Equity-Indexed Annuities

An investment contract with an insurance company that combines a minimum guaranteed return rate with another return rate to a market index. Reduced access to investor money without penalties, higher fees, and complexity of contracts are concerns. All guarantees are subject to the insurance company's ability to pay.

Excess Accumulation

An insufficient withdrawal from a 401(k), 403(b), 457 or traditional IRA for an individual who is subject to the required minimum distribution (RMD) rules. A 50% excise tax may be imposed by the IRS.

Excess Contribution

The amount of an IRA contribution that exceeds the allowable limits. If an excess contribution is not corrected, a 6% IRS penalty applies until the excess contribution is corrected.

Fair Market Value

The value of an IRA as of a certain date. The December 31 fair market value must be provided on IRS Form 5498 each year.

First-Time Homebuyer Tax Penalty Exception

Someone who has not had an ownership interest in a home for the past two years. There is a \$10,000 lifetime maximum for first-time home purchase.

Fixed Income

A security that pays a fixed rate of return over a set term. Usually refers to bonds, guaranteed investment contracts, and certificates of deposit.

Guaranteed Investment Contract (GIC)

A contract between an insurance company and an investor that includes a specific rate of return on the investment over the life of the contract. GICs are a conservative investment with stable returns.

Health Insurance Premiums for the Unemployed

A taxpayer who has been receiving unemployment compensation for 12 consecutive weeks is eligible to take a distribution to pay for health insurance premiums for the IRA owner, owner's spouse, and any dependents. This exception will result in no 10% early withdrawal penalty tax.

Glossary of Investment and Financial Terms

(continued)

Index

A benchmark to measure how well an investment is performing. The Dow Jones Industrial Average and Standard & Poor's 500 Index are two widely used stock indexes.

Indirect (60-Day) Rollover

A withdrawal from a retirement account that is rolled over to an eligible plan or traditional IRA within 60 days. An indirect rollover differs from a direct rollover or direct transfer in that the money is sent to the participant and not directly to the new plan.

Inflation

Prices rise when too much money in the economy tries to buy too few goods. Higher prices mean that a dollar buys less each year.

Interest

Money paid by a borrower as compensation for the use of borrowed money. This amount is generally expressed as an annual percentage of the principal or invested amount.

Investment Grade

Bonds rated AAA to Baa by Moody's Investors Service, Inc., or BBB and higher by Standard & Poor's Corp. are deemed to be "investment grade."

Investment Objective

The stated purpose of an investment. Capital growth, current income, tax-deferment, risk reduction, etc. are typical. Personal objectives may be college savings, retirement, or other goals.

Investment Strategy

A plan to fulfill an objective by selecting investments that produce appropriate returns at acceptable risk, and identifying alternative investments in anticipation of market changes.

Maturity Date

The date on which the principal amount of a security (such as a bond) becomes due and payable to the holder.

Life Expectancy

The number of years an individual is expected to live based on his or her current age.

Liquidity

Ease with which an asset can be converted to cash. Real estate is less liquid than a bank account.

Mandatory Tax Withholding

An IRS mandated tax withheld from the gross proceeds of a withdrawal from an eligible savings plan. The withholding rate varies according to the participant and the type of distribution.

Modified Adjusted Gross Income (MAGI)

For most taxpayers, MAGI is the same as their AGI. MAGI is a person's AGI, with adjustments for the following: required minimum distributions (RMD), income from U.S. Savings Bonds used for higher education expenses, foreign earned income exclusions, foreign housing exclusions, IRA deductions, and employer-reimbursed adoption expenses.

Mutual Fund

Allows investors to pool money to invest in stocks, bonds, and other securities. Rather than buying individual stocks or bonds, investors buy "units" of the fund itself. Diversification and professional investment management are among a mutual fund's strengths. Each fund will vary according to its holdings, objectives, and performance.

Nondeductible Contribution

A contribution made to a traditional IRA that cannot be deducted from an individual's federal income taxes. If a nondeductible contribution is made, the taxpayer must file IRS Form 8606.

Ordering Rules

The order in which Roth IRA assets are deemed to be withdrawn. The first assets withdrawn will be considered to be a return of contributions made. After contributions are withdrawn, further withdrawals will be amounts that have been converted from a traditional IRA. Finally, the earnings will be considered withdrawn.

Penalty-Free Withdrawal

A withdrawal exempt from the 10% early withdrawal penalty tax. Exceptions include: purchase of a first home, qualified education expenses, qualifying medical expenses, health insurance premiums when unemployed, payments paid over the owner's life expectancy, disability, or payments to a beneficiary.

Pension Plan

A retirement plan organized to receive contributions and pay a lifetime monthly benefit when the participant retires.

Portfolio

The total investment holdings of an individual or the total investment holdings of a mutual fund.

Premature Distribution

Distributions taken from a traditional or Roth IRA before the account owner is age 59½. Premature distributions are usually subject to a 10% early withdrawal penalty tax, unless an exception applies.

Principal

The amount originally invested.

Prior-Year Contribution

A contribution made to a Roth or traditional IRA between January 1 and April 15 for the prior tax year.

Qualified Roth Distribution

A distribution from a Roth IRA that meets the 5-year holding period requirement and the taxpayer is over age 59½.

Qualified Higher Education Expenses

Expenses such as tuition, fees, books, and supplies at an eligible higher education institution. These expenses include those of the IRA owner, spouse, children, or grandchildren. These expenses are exempt from the 10% early withdrawal penalty tax.

Qualified Retirement Plan

A qualified retirement plan is one that has been approved by the IRS and generally gets preferential tax treatment.

Qualifying Medical Expenses

Unreimbursed medical expenses, in excess of 7.5% of adjusted gross income distributed from an IRA, are exempt from the 10% early withdrawal penalty tax.

Rebalancing

The process of restoring a portfolio to its target mix by periodically buying or selling some of each investment option. The Balanced Fund and the Target Date Funds are automatically rebalanced quarterly, when target ranges are exceeded.

Recharacterization

A choice to treat a contribution made to one type of IRA as having been made to a different type of IRA (e.g., from a traditional IRA to a Roth IRA or vice versa).

Required Minimum Distribution

After a Traditional IRA holder reaches 73 or a 401(k), 403(b), 457 plan participant reaches age 73 and terminates employment, a minimum amount must be withdrawn every year.

Rollover IRA

A traditional IRA that receives assets from an eligible plan withdrawal.

Roth IRA

A tax-deferred retirement account that allows annual nondeductible contributions. Qualified distributions from a Roth IRA may be tax-free.

Security

An asset (usually intangible) such as a share of stock or mutual fund.

Short-Term

Investments usually held for under five years, although long-term and short-term have no firm boundaries. May include treasury notes, CDs, money market accounts, etc.

Stock

A security that represents an ownership share in a corporation. Stockholders participate in the company's financial direction for better or worse; also known as equities.

Tax Deferral

Postponing payment of income taxes on retirement contributions and any subsequent earnings until the money is withdrawn.

Traditional IRA

A tax-deferred retirement account that allows voluntary contributions that may be deductible on an individual's income taxes. Withdrawals from a traditional IRA will be partially or fully taxable when withdrawn.

Variable Annuities

An investment contract with an insurance company where the rate of return varies based on the performance of selected securities. Reduced access to investor money without penalties, higher fees, and complexity of contracts are concerns to consider.

Volatility

The height and depth between which an investment's value may fluctuate and how frequently. Volatility is a chief element of risk. Investments with greater potential returns are usually more volatile and therefore more risky.

Yield

The annualized rate at which an investment earns income. Usually refers to fixed income. Not the same as total return. A bond may continue to yield 8% even as its value drops.
