HB0206 - Epinephrine Auto-injector Access Amendments

Any Fiscal Impact - no

Updated 01/20/2021 14:21:06 by David Hansen

HB 206 would add epinephrine auto-injectors to the discount program created for insulin in 2020. As such, Utah residents would be able to buy epinephrine auto-injectors at PEHP's post-rebate price for a savings of about \$180 a box (two injectors) off of the retail price of about \$675 -- given existing rates, contracts, and making the State Health Insurance Risk Pool whole for fronting the rebate savings. We anticipate implementation and other costs for the program of at least \$25,000. This amount can be absorbed within existing budgets.
