

**HCR 10** CONCURRENT RESOLUTION DIRECTING PEHP REGARDING HORMONE REPLACEMENT THERAPY (Lisonbee, Karianne)

**Anticipated Fiscal Impact:** None

HCR 10 directs PEHP to include hormonal replacement therapy (HRT) for menopause in the formulary for state employees. This direction is consistent with current practice of covering hormones, except that PEHP does not cover hormones when compounded together for a customized dosage. To comply with the intent of the resolution, PEHP would (1) continue to pay a provider-submitted claim for a compounded hormone if the claim is limited to covered hormonal ingredients and excludes noncovered hormones and fees and (2) reimburse a member for any covered hormone included in a compounded hormone at PEHP's applicable rate. Thus, because PEHP would limit payment to covered hormones at the applicable rate, there would be no fiscal impact to the state of PEHP paying for compounded hormones.
